

Visual Planning Corporation's DAHLE Shredders on our Website are **Canadian Government approved** and meet or exceed all RCMP specifications for destruction of Confidential, Secret and TOP Secret documents. They are listed in the Security Equipment Guide (SEG) and the info is available only to Government departments. **Types of Shredders: Type II (Level 6)** is a special sub-category reserved for NSA (USA) approved high security shredders. They are recommended where a TRA recommends a higher degree of security (e.g. embassies, overseas deployments, smaller than 12 pt. text size). **Type II** are shredders designed for the secure destruction of Secret, Top Secret and Protected C information written on paper or other text based media. **Type III** Shredders approved for the secure destruction of Confidential and Protected B (subject to TRA) information written on paper or other text based media. **Type IIIA and Type IIIB** are sub-categories of Type III for office shredders. They are used mostly for the destruction of information in bulk. All the Models herein have been submitted for testing and meet the requirements of the **RCMP standard DNI (2005) and are listed in the SEG.** All Dahle Cutting cylinders are made from **ONE single piece of the highest quality SOLINGEN STEEL.** **The Type II (Level 6) shredders reduce your Letter size sheets to into 16,000 pcs. of 1mm x 4.7mm,** the smallest size you can get, and makes it impossible to re-assemble, in other words total destruction is achieved. For more specifications, see illustration below. **Prices effective : Jan. 1, 2011**

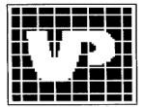

Model #20434DXC Hi-Security Deployment Shredder
Commercial Price: \$3233.00
Government Price : \$2968.00
