

**VISUAL PLANNING CORPORATION** manufactures and sells a great variety of **Sliding Board Display Units, primarily Magnetic Whiteboards**, but also in Green Chalkboard, Magic Velcro Boards & Bulletin Boards. Besides Canadian and US Government Departments and Agencies, we also did a huge Installation of Magnetic Sliding Boards for the Saudi Arabian Navy . In short, we can handle any project. Sliding Boards on multiple Tracks provides the client with maximum display area , but with minimum footprint. Even though most Displays are installed against walls, we will also produce Mobile units in many sizes upon request, keeping in mind space and doorway limitations. Contact us for more info and a quote on your specific needs. Below are just a few of the more popular models we have produced in the past.

While the schematic at the left shows a track unit, we have now standardized and supply only the tracks in pairs to produce a more economical and efficient product. So we will supply units with either, 2, 4, 6, 8 & 10 tracks ,and we have quoted herein on the most popular 4 track Display units, leaving One track free for future expansion. We'll be most happy to quote you on 6, 8 or 10 track units with your Board sizes on request. Thank you. Merci.

**PRICES BELOW ARE FOR SYSTEMS WITH WHITE MAGNETIC BOARDS !**
